ABOUT ME

I'm a Full-Stack Developer finishing my Higher Professional Training in Multiplatform App Development (DAM). I build modern web applications with TypeScript, React, Next.js, and Angular, and work with automation tools like n8n. Focused on building efficient, user-friendly applications and dedicated to continuous learning and problem-solving across the full stack.

EXPERIENCE

Automation & Development Intern

2026

Studio11

Task and message automation using n8n workflows. Backend development with C#. Design and integration of automated pipelines for business processes.

Freelance Full-Stack Engineer

2023 – Present

Wallapop Offer Finder

Sole developer of a full-stack web app (Next.js, React, TypeScript) that sends real-time price alerts when tracked Wallapop listings drop below a set threshold. Responsible for the full development cycle — front-end, back-end API integration, and database management.

TECHNOLOGIES

TypeScript React Next.js Angular Node.js HTML / CSS
PostgreSQL Prisma Git C# n8n Tailwind CSS REST APIs
